

A POWER IN ENERGY EFFICIENCY.

Solar Water Heating Systems are **SMART** for Business or Home

Everyday, solar energy amounting to around 200,000 times present global electricity generating capacity falls on the earth. All types of businesses and homes are generating big energy savings using Solar Hot Water Heating Systems to produce hot water for commercial and institutional uses including:

- Schools
- Manufacturing
- Offices
- Hotels
- Country clubs
- Swimming pools
- Restaurants
- Car washes
- Laundromats

Here are some of the benefits of Solar Hot Water Heating Systems:

- Reliable
- Safe
- Solar power is clean, non-polluting, and free
- Reduces utility bills
- Reduce dependency on foreign oil
- Reduce carbon emissions
- Build sustainable future
- Virtually maintenance free

The Savings Add Up!

With a Solar Water Heating System from Earthwell, a family of four can save up to \$400 annually on their gas or electric bill. Solar Water Heating Systems are very durable and will operate for 20 to 30 years – that generates between \$8,000 and \$12,000 in savings over the life of the system, even more as utility rates rise.

Renewable Energy

Renewable energy from the sun, wind, and water is freely delivered to each of us every day and offers the opportunity for economic and environmental improvement. Earthwell's North American Board of Certified Energy Practitioners (NABCEP) certified professionals can design and install your renewable system to harness that energy as well as provide information on tax deductions and available rebates.
